Configuration Management

Position ID: 2016 – E– 202
Position Location: Washington Metro Area
Duration of Position: Full-Time
Configuration Management
Need Date: Immediate

Intelligence Consulting Enterprise Solutions, INC. is looking for a Configuration Manager.

Description:

The successful candidate will develop computer system specifications that address business requirements and that fit with the company's system architecture standards. They will also establish and document system parameters and formats, as well as ensure hardware and software compatibility. Revision of existing systems and procedures to correct deficiencies and maintain more effective data handling, conversion, input/output requirements, and storage.

Required Qualifications:

- BS in engineering, computer science, or related technical discipline
- 5+ years systems engineering experience
- Advance MS Word skills and REMEDY database knowledge
- Knowledge of Customer CM Processes
- Excellent written, verbal, and presentation skills
- Strong interpersonal, problem-solving, and multi-tasking skills
- Ability to work independently and within a team environment
- Ability to work with multiple government customer stakeholders while meeting mandated timelines

Desirable Qualifications:

- Knowledge/experience analyzing impacts from DRs
- Knowledge/experience with supporting customers
- Ability to work in government environment as part of a multi-contractor team
- 1-4 years experience with customer's CM control processes and procedures

In Configuration Management it is mandatory to be able to provide extensive work in system administration with the knowledge of many technologies. One must perform daily with custom applications and software to ensure builds and deployments are completed smoothly.
