Intelligence onsulting Enterprise Solutions, INC. is looking for a **Readiness Technical Expert**.

Description:

- Provide senior level specialized engineering, acquisition, and program management support to the N2W Assistant Program Manager for Integration & Readiness (APM-I&R) to support the engineering, planning, coordination, and execution of N2W Program Integration activities in support of the overall N2W Program.
- Serve as primary N2W technical advisor for all N2W readiness related functions.
- Advise all N2W APMs throughout the life-cycle of the program on requirements, processes, and industry best practices relating to the management of the various N2W technical baselines, including those managed by NGA and US Army Corps of Engineers (USACE).
- Provide proactive and anticipatory support and advice related to N2W readiness and baseline management activities' impact to the N2W Integrated Master Schedule (IMS), particularly the N2W Critical Path.
- Provide SME support to the Government and N2W Program Management Office (PMO) representatives at meetings.
- Assist APM-I&R in planning and technical exchanges between prime contractors, segments, projects and customers and at NGA readiness forums.
- Assist N2W Readiness Review Team (RRT) meetings & prepare MDAs for events.
- Define / Communicate N2W Readiness Processes and related risks.
- Assist with readiness technical exchange meetings (TEMs) with APMs & stakeholders.
- Identify and support readiness process improvement best practices.
- Support management and optimization of complex competing requirements across multiple disciplines in a fiscally constrained environment.

Required Qualifications:

- Bachelor's degree in a related field and 12 years of experience/8 years of specialized experience.
- Demonstrated experience on a complex government integration and engineering program involving multiple systems, contractors and agencies.

Desired Qualifications:

- Graduate degree in a related field.
- Understand the geospatial intelligence mission and its contribution to the IC.
- Know NGA processes and tools, to include Systems Engineering, Acquisition, Configuration Management, Readiness and Security.
- Familiar with NGA requirements processes, IC-ITE CONOPS, and NGA Infrastructure Service Provider (ISP)/Application Service Provider (ASP) Model.
- Familiar with USACE processes.
- Related experience in a complex mega facilities project.
