Intelligence Consulting Enterprise Solutions, INC. is looking for an **Anti-Terrorism Specialist**.

Description:

Supports Agency planning against Anti-Terrorism (AT) to include risk management, planning, training and exercise, resource application, and program reviews. Interprets government regulations and applicable codes, and advises government management on the best course of action to ensure compliance. Develops programs, procedures and contingency plans based on a risk approach and proposes solutions that monitor, evaluate and enable resolution to safeguard the workforce, reduce property loss, and support NGA mission continuity. Through an all-hazards mitigation, preparedness, response and recovery program efforts, EM orchestrates unity of effort across NGA to safeguard the workforce, reduce property loss, and support NGA mission continuity. Oversees the development, integration, and exercising of AT plans and policy. Prepares and conducts briefings and overviews to educate Agency personnel and submits position and information papers in response to government requirements. Provides strategic direction, vision, and leadership. Demonstrates considerable expertise in providing solutions and recommendations based on internal and external factors. Monitors plans and exercises, assesses plan effectiveness, and recommends plan improvements to improve responses to emergencies. Cognizant of national and DNI policies and provides expertise to act as trusted advisor to NGA senior leadership. Able to provide strategic direction in leading activities in support of team and enterprise objectives.

Required Qualifications:

- Bachelor's degree or equivalent experience in a related field
- 3 – 6 years of experience in two or more areas of the following: All-Hazards Emergency EP, AT planning, Force Protection planning and evaluation, Threat and Vulnerability planning, assessment or mitigation, Crisis Management, Security Operations, Strategic Planning and Policy, Risk Management, and participation in AT, EM or Mission Assurance exercises.
- Strong customer service teaming skills; ability to collaborate in cross-functional team
- Certification from FEMA for Incident Command System (ICS) training (e.g., ICS-100/200/300/700/800) within 1 year of on-boarding

Desired Qualifications:

- Graduate degree or equivalent experience in a related field
- Security Engineering Course desired
- Demonstrated working knowledge of the NGA organization, leadership, programs, systems
